

PIYUSH KUMAR

Roorkee, Uttarakhand | abiral22137711@gmail.com | +91-8409919019 | [linkedin.com/in/piyushkumar1723](https://www.linkedin.com/in/piyushkumar1723) | github.com/piyush1723

PROFESSIONAL SUMMARY

Aspiring Data Analyst and Data Scientist with strong skills in **Python, SQL, Excel, Power BI, and Machine Learning**. Experienced in data preprocessing, EDA, visualization, and predictive analytics through real-world projects. Developed an end-to-end **Social Media Sentiment Trend Analysis** project using **70,000+ records** and interactive dashboards to generate actionable business insights. Eager to apply analytical and problem-solving skills in a Data Analyst internship.

TECHNICAL SKILLS

Languages: Python, SQL, Java (Intermediate)

Data Analysis & ML: Regression, Classification, Clustering, Recommendation Systems, Collaborative Filtering, Feature Engineering, Cross-Validation, Model Optimization

Libraries: Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn

Visualization: Power BI, Excel

Tools & Platforms: Git, GitHub, VS Code, Jupyter Notebook, Google Colab, Flask, Docker, Google Cloud Platform (Basic)

EXPERIENCE

Machine Learning Project Intern

Jun 2026 – Jul 2026

Arsh AI Technologies

- Engineered end-to-end NLP sentiment analysis system processing 70,000+ social media posts with 83% accuracy
- Implemented complete ML pipeline: data preprocessing, feature engineering (TF-IDF), model training and evaluation
- Selected LinearSVC as optimal classifier after evaluating multiple algorithms based on performance metrics
- Deployed production-ready Streamlit web application with real-time predictions and interactive analytics dashboard
- Integrated MySQL for data storage and created SQL queries for sentiment trend analytics
- Designed Power BI dashboard visualizing sentiment distribution and temporal patterns for stakeholder insights

GitHub: [Social-Media-Sentiment-Trend-Analysis](#)

Live Demo: [sentiment-intelligence-platform.streamlit.app](#)

Data Science Summer Intern

Jun 2025 – Jul 2025

CertED Technologies — Haridwar University

- Built and validated machine learning models for predictive analytics, achieving 90%+ accuracy on test data
- Boosted model performance by 12% by applying cross-validation and hyperparameter tuning techniques
- Cleaned and engineered features across multiple datasets, improving data quality for downstream modeling
- Deployed ML models as REST APIs using Flask and Docker, enabling real-time prediction serving

PROJECTS

Customer Shopping Behavior Analysis

Python, SQL, Power BI

- Cleaned, transformed, and analyzed 3,900+ customer transaction records using Python and SQL
- Performed customer segmentation, revenue, subscription, and purchase-behavior analysis to surface key business trends
- Designed an interactive Power BI dashboard to visualize sales performance and customer KPIs for stakeholders
- Translated findings into data-driven recommendations to improve customer engagement and marketing strategy

GitHub: [Customer-Shopping-Behavior-Analysis](#)

Spotify Music Recommendation System

Python, Pandas, Scikit-learn

- Built a content-based and collaborative filtering recommendation engine using a Spotify dataset
- Implemented TF-IDF vectorization and cosine similarity to compute song-to-song similarity scores
- Tuned similarity thresholds and engineered features, improving recommendation relevance

GitHub: [spotify-music-recomendation-system](#)

EDUCATION

B.Tech, Computer Science Engineering

2023 – 2027

Haridwar University | CGPA: 7.2 / 10

Diploma, Electrical Engineering

Govt. Polytechnic, Saran (Bihar) | CGPA: 7.8 / 10

Class 10: 76%

CERTIFICATIONS

- Data Science Summer Internship — CertED (2025)
- Microsoft Power BI — Microsoft Learn (2025)
- IBM SkillsBuild AI Internship
- Python for Data Science — NPTEL
